

## Analysis of a survey with opinions about different movies

*GOAL: Analyzing of the data we have to find out the most popular genres among the participants*

Name	Age	Favorite Genre	Favorite Movie	Rating (1-10)
Anna	24	Comedy	The Intern	8
Ivan	31	Action	John Wick	9
Maria	27	Romance	The Notebook	7
Georgi	35	Drama	The Pursuit of Happiness	10
Elena	22	Horror	The Conjuring	6
Petar	29	Sci-Fi	Interstellar	9
Nikolai	33	Thriller	Gone Girl	8

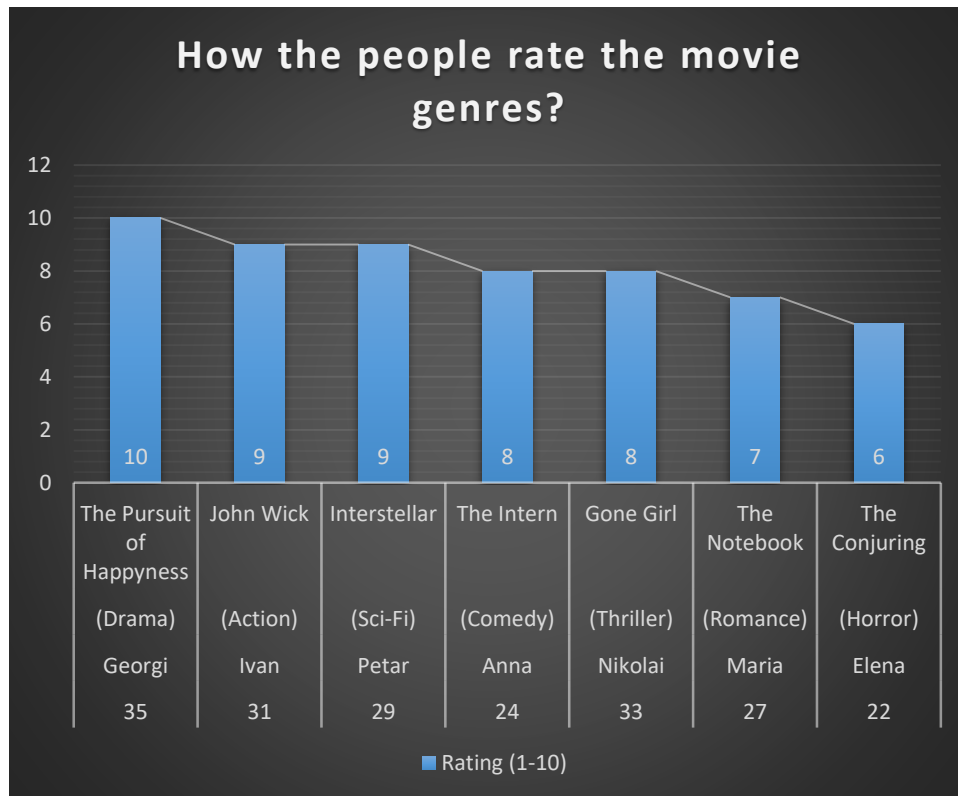

So, we have the data here:

What do we see?

- We analyze a small group of young people between 22 and 35 years old. Total of 7 people;
- According to the table we have a high rating of 10 in the movie called "The Pursuit of Happiness". It looks like for some young people the **Drama** genre is attractive;
- We also see that we have 2 times of rating with 9 of 10 in the following:
  1. Movie "John Wick" with Action genre;
  2. Movie "Interstellar" with Sci-Fi genre.
- There are also 2 ratings with 8:
  1. "The Intern" movie with Comedy genre;
  2. "Gone Girl" movie with Thriller genre.
- Not that much attractive are the Horror genre (6) and the Romance genre (7).

## What are the results?

Young people like mostly Drama movies (10), Actions (9), Sci-Fi (9), Comedies (8) and Thrillers (8). We recommend to Movie makers, Screenwriters, Producers, Directors and other movie specialists to focus mostly on these genres, at least for now, until we make and publish a new analysis. This survey shows well enough the reality.

That was an analysis of which are the preferred genres of the young people in 2025. Thank you and until next time when the situation changes.
